About This Game

"I just want to go home..."

A hand-drawn 3D third-person puzzle-platformer. Control Drew, a lost young girl trying to find her way back home, through a series of abstract levels requiring you to use clues in the environment to find invisible paths, gaining color to her black-and-white character as you progress.

- Featuring traditional animation in a fully third-person 3D environment, showing the possibilities of image-based animation (not relying on 3D models) in any type of game.
- Basic, challenging, yet not frustrating, requiring patience and observation. Consists of short invisible platforming levels using a variety of visual clues to help the player find their way to the end of each environment, requiring you to look before you leap.
- Simple story leading to an emotional conclusion.

Title: Drew and the Floating Labyrinth

Genre: Adventure, Indie

Amazing game, the controls and graphics are so good.. Gameplay loop is not fun. Becomes a clicker game quickly. Endless mobs spawning from a birther node gets really frustrating if you do not have the correct gun. Easy 100% though if you are a completionist.. Good old school platformer with fluid, smooth 1:1 movement. Great chiptune soundtrack and level design. The only downside is weapon/power switching at same category/slot/key which is very confusing on latest levels, but overall, I really enjoyed the game and can't wait to learn speedrun.. Very educational and highly addictive! Kinda must-have for robot enthusiasts <3. Existential Crisis: The Game

No really, this game, while legitimately good in how it delivers its message, is one of the most depressing games you'll ever play. It's a game about a game where your character dies, and its programming object is freed from active memory, and that videogame character is desperately trying to buy a few more microseconds of time to make peace with the inevitability of being premanently erased by the system's garbage collector. Yes, this is a game that pointedly informs you that, some day, you will die.

I considered it edifying as an experience to have through games, but consider this both a strong reccomendation and a legitimate warning. It's hauntingly beautiful in its effort to gameify the final journey we all must take some day.. Too much soil

+ Honking noises

Better than Overwatch

. Fun with friends.. Short, but very entertaining visual novel. As others have already said, the music is excellent and really helps set the mood. The endings are easy to figure out but get more complex as you near the True End. Overall a good play, and I hope to see more from these developers in the future!.. fun space game. Keeps it simple and enjoyable.

do i have it

V. Guys we need to protect Shion.. I mean why not it's cute :D. This game is awesome, its so soothing, and I found myself having a hard time at some points. Very worth it. This is an exceptionally well done game. The attention to detail is outstanding.

It basically follows the 16-bit (SNES, Genesis, Amiga, etc) style of platformer except here everything is in HD. The levels are colorful, well drawn and most important there is a good amount of interaction.

The gameplay is very good! It's the kind of game that encourages exploration with the idea that if you die no big deal you've learned something so try again armed with the knowledge you just gained. That is old school. And here it is very well done.

The pace of the game is a bit on the slow side for my personal taste but certainly not so much as to ruin the game. The only part that I think absolutely should be faster is when you die. I don't want to wait for my bunny angel to rise up to heaven. Perhaps there is a way to skip that sequence but I have not found it yet. When I die I want to be able to immediately get right back to the start of the level and start playing again.

Besides that this game is excellent! Oh another thing I want to mention is the music & sounds. Both are superb. The music puts me in a sort of fun lazy mood. The sounds are very effective at complementing the on-screen interaction. Overall the entire game is very well done and it is easy to see the developer spent a lot of care and time creating this game.

Highly recommended if you enjoy platform games.
